

Time estimation for sprint #2

Individual Time Allocation

Team Capacity

Name	Task description	Task time estimate (expected)	Task time (actual)
@ Danielle Rosenfeld-Lovell	Create a renderable front end and an API function to interact with the backend for a feature to send an event invitation to a user's contact. This will include an automatically generated email invite, ideally with an attached ical file	16-24 hours (expect task to take about the equivalent of 2-3 days of full time work)	16 hours (and counting)
@ Danielle Rosenfeld-Lovell	Prepare all documentation for submission	2 hours	3 hours approximately
@ Benedict Jefferson	Renderable page presenting contact information on the FE	Approximately 6 hours	4 hours
@ Benedict Jefferson	Renderable page presenting the user's own profile information on the FE	Approximately 6 hours	4 hours
@ Hai Nguyen	Input validation optimisation	8-10 hours	16 hours approximately
@ Hai Nguyen	Developing the search feature to enable the user to search for their pre-existing contacts	16-24 hours	12 hours approximately
@ Lam Nguyen Khoa	Create renderable front (home) page with up to date events from the DB rendering on it	24 hours	12 hours
@ Lam Nguyen Khoa	Update database to support multiple registered users (@ Hai Nguyen also contributing to this task)	24hrs	@ Hai Nguyen ended up working more heavily on this and it took her 5 hours
@ Meaghan Gaunt	Get events to render on the homepage	24 hours	36 hours
