

User Acceptance Test (UAT) form

This form will serve as a record of User Acceptance Testing with the client. The numbers at the far left reference acceptance criteria defined elsewhere under "Acceptance Criteria".

No.	Acceptance Criteria	Critical (Y/N)	Test result (Accept /Reject)	Comments
1*	As a user, I want to be able to use service securely so that my information and relationship are protected. Specifically: <ul style="list-style-type: none"> I am not able to get unauthorised access to my information. 	Y	Accept	Currently can't access anything unauthorised and if you try, you get an unauthorised warning. A more sophisticated way to manage this is to never let a user access a route without having authenticated, but could be something to think about with more time if the project continued to be refined.
2	As a user, I want to have the app present my relationships as a graph, so that I can visualise my own social network graphically.	N	Reject	Time did not permit implementation of this no-critical feature
3*	As a user, I want to view my saved/invited/own upcoming events.	Y	Accept	
4*	As a user, I want to register for an account, add my personal info, so that I have my own account and start using the app.	Y	Accept	Able to login immediately after registering, currently no email confirmation required.
5	As a user, I want to search for people/public events by names and tags, so that I can look for people that I want to connect to/ public events that I am interested in.	N	Reject	Feature to search public events and connections not implemented due to time constraints.
6*	As a user, I want to get notifications of an event when it is coming in <time> (this can be set by me, e.g 1 day), so that I get reminded in case I forget.	Y	Reject	<input type="checkbox"/> Team to aim to develop this feature by the end of the week because we established that this is important to the client.
7*	As a user, I want to see log of my past events, so that I can manage/ look for info when needed.	Y	Accept	Can look this up per contact.
8	As a user, I want to instant message my people, so that I can conveniently chat with them.	N	Reject	Feature not implemented due to time constraints.
9*	As an event holder, I want to create an event, manage its privacy and other settings, so that I can manage my event to meet its purposes.	Y	Accept	Broadly able to edit the event, although at the moment the event is always private; can only be viewed by participants as this is not a Facebook-like social media platform.
10*	As an event holder, I want to be able to send event invites, so that I can invite people who I want to take part in. Specifically: <ul style="list-style-type: none"> I want to be able to send an email invite to a contact. 	Y	Accept	Email arrived to inbox of user.
11	As an event holder, I want to view a list of attendees/ people who are interested in my event, so that I estimate its range of influence and get it ready on the day.	N	Reject	Functionality not implemented due to time constraints.
12	As a member of a family, workplace and community, I want to be able to keep track of the people I interact with based on how I know them. Specifically: <ul style="list-style-type: none"> I can create a contact and add relationship tags for that contact. When I have created my contact, I can then look them up from the contacts page. 	Y	Accept
