Acceptance Criteria

Acceptance criteria refer to a set of predefined requirements that must be met in order to mark a user story complete.

User Story ID	User Story	Given	When	Then
1	As an user, I want to be able to use service securely so that my information and relationship are protected.	Someone else know the id of my relationship, event or contact data.	They try to access it.	• The access is denied.
2	As an user, I want to have the app present my relationships as a graph, so that I can visualise my own social network graphically.	I have a list of contacts that have complex relationships with each other.	I click on a special button in Contact menu.	• I should see a graph depict my network.
3	As an user, I want to view my saved/invited/own upcoming events.	I have a list of events.	I click on the Events page.	• I should be able to see all saved/invited events. • I should be able to see all events I participated.
4	As an user, I want to register for an account, add my personal info, so that I have my own account and start using the app.	I input all required information correctly on the Register page.	I click the submit button.	• The system successfully created my account, saved it securely and notify me.
5	As an user, I want to search for people/public events by names and tags, so that I can look for people that I want to connect to/ public events that I am interested in.	I have a list of people/ events in my account and a name/tag that I want to search for.	When I used the search function provided by the software.	• I should be able to get all people/event that have the name/tag that I want.
6	As an user, I want to get notifications of an event when it is coming in <time> (this can be set by me, e.g 1 day), so that I get reminded in case I forget.	I have an upcoming event and a reminder time set by me.	The time until the event is less than the time specified in reminder time.	• The software should send me an notification, either by email or by phone notification.
7	As an user, I want to see log of my past events, so that I can manage/ look for info when needed.	I have input some events in the past.	I click on See All button on Event page.	• The system return all events that happened in the past.
8	As an user, I want to instant message my people, so that I can conveniently chat with them.	I have some User that I added to my chat list.	I click on their chat window on Message page.	• Im able to send and receive instant message with them.
10	As an event holder, I want to create an event, manage its privacy and other settings, so that I can manage my event to meet its purposes.	I have a event need to be created with a specific purpose.	I click Create/Edit button Event on the software.	• The event have detailed list of settings and Im able to precisely control it.
11	As an event holder, I want to be able to send event invites, so that I can invite people who I want to take part in.	I have a list of people I want to invites.	I put their name on the Event page's invitation list and click Invite button.	• The system will send an invitation to their email (which specified in their Contact profile)
12	As an event holder, I want to view a list of attendees/ people who are interested in my event, so that I estimate its range of influence and get it ready on the day.	Some people accept my invitation to my event.	I click the See Confirmed Participants button on my Event page.	• The system display people that accepted my invitation and showed interest in my event.
13	As a member of a family, workplace and community, I want to be able to keep track of the people I interact with based on how I know them.	I have a list of contact and I can search for one by their name or a tag that I have associated with my relationship with them.	I am able to specifically select the right contact or see relevant groups of contacts.	• I can organise events for specific kinds of people in my life.
